CHEMICAL PEELS & ADVANCED ENZYME TREATMENTS

BIOELEMENTS ULTRA-DETOX CHEMICAL PEEL

The skin you want is under the skin you see. Reveal it with our powerful, non-surgical acid-hybrid peel. You'll undo years of visible damage and premature age signs – without the redness, flaking, or actual “peeling” of the skin from a traditional peel. Our advanced peel technology removes the uppermost layers of the skin at a microscopic level, to immediately tighten, unclog pores, improve lines and leave skin with a younger, velvety-smooth texture. Plus, you'll benefit from detoxifying activated charcoal to draw out aging impurities. Best results achieved with a series of treatments – your esthetician will choose from two different glycolic acid levels to meet your skin's needs each time.

Treatment time: 60 minutes

POWERFUL SURFACE PEEL

Your skin's introduction to a peel begins here. Potent but gentle lactic acid, plus exfoliating pumpkin fruit acids and stimulating pomegranate zero in on premature age signs, with zero recovery downtime. Ideal for inflamed breakout-prone skin, surface wrinkles, and even post-acne dark spots. You'll see an increase in hydration, as skin emerges visibly clearer, brighter and less lined. Achieve the best results with a series of treatments.

BIOELEMENTS ENZYME EXFOLIATION TREATMENT

Dramatically aid the removal of aging dead cells, awaken dull skin and target pores with this active enzyme treatment that's ideal for all skin types – even sensitive. Your esthetician will choose the enzyme or peel for your skin's exact needs, formulated with active ingredients including papain, papaya and pineapple enzymes, and stimulating cinnamon.
